

Action Plan: Networking Coding and Web Development

I will be finding meetups through Meetup Aswell as surfing the web itself to locate local conventions discussing IT, software development, AI, Cyber Security and the likes.

Through just googling tech events in Brisbane, Aswell as using meetup.com I've found the below.

18
MAY

AI and Web3 Convention Brisbane
Sat 18 – Sun 19 May
Brisbane Convention & Exhibition Centre, Merivale St
South Brisbane QLD

29
AUG

Something Tech 2024
Thu, 8:00 am – 4:00 pm
Howard Smith Wharves, 5 Boundary St
Brisbane City QLD

11
SEPT

YOW! Tech Leaders Summit Brisbane 2024
Wed, 8:30 am – 6:00 pm
Cliftons Brisbane, 24/288 Edward St
Brisbane City QLD

Proudly sponsored by:

Wednesday, May 15

IICA Brisbane Technology Expo 2024

Bringing together leaders in technological excellence in instrumentation, control and automation.

THU, MAY 23 - 6:00 PM AEST

Mobile app development meetup

Brisbane Mobile App Development

12 attendees

THU, MAY 23 - 6:00 PM AEST

GDG Brisbane Mobile App Development

GDG Brisbane

11 attendees

Goal 1:

- Find local meets relating to web development that are free.
- Find local meets relating to software development and different programming languages.
- At each meet take as many notes as possible and introduce myself not only to the experienced but other newbies like myself.
- Exchange contact information and ideas on projects and set separate meetups if possible, to cultivate a group/personal community of friends and people like minded.

Goal 2:

- Attend more local meetups in Brisbane that are tech related.
- Branch out into more topics outside of “tech” specifically to find business and startups to build a profile of my own, include group/community made if people have been networked.
- Work on group projects as well as solo endeavours to build a favourable portfolio and understanding of web development/ software projects.

Scheduling Calendar:

Event	Objective	Day	Time	Conclusion
AI and Web Convention Cancelled pending	Network and observe to learn	TBD was cancelled however is being rescheduled	TBD	Below
Something Tech 2024	Attend an join network lunches/learn	29 th Aug – 30 th Aug	8am to 4pm	Below

Tech Leaders Summit	Experience sharing meet and greets	Sept 11th	---	Below
IICA Brisbane Technology Expo	Complimentary networking time/Learning	15 th May	12pm to 6pm	Below
Mobile App Development Meetup	Talks on Android and Flutter and app development	Thurs May 23rd	6pm to 8pm	Below

AI AND WEB3 CONVENTION:

As this has been cancelled till later notice it is hard to define exactly what would be learnt and distributed, however the learning opportunities as far as I can determine would be rich in AI and hopefully Web development or Web application development. Following that networking opportunities with not only other peers but experts in their respective fields would be available and highly sought for by myself, as the wealth of knowledge about said software and Technology would have huge benefits to starting my career in the IT industry through being able to ask what they found useful in certain projects and even just observing the way they layout their projects and build from scratch could be highly beneficial to finding and improving my own project development style.

SOMETHING TECH 2024:

Something tech not only looks fun but also like an amazing opportunity to meet experts and once again those like myself. There's a lot of talks and panels to do with tech Aswell as networking lunches which I personally have never heard of but sounds quite interesting. There also seems to be a lot of focus of technology innovation which is super exciting to hear as that would benefit me greatly in refining my own edge on working towards being "cutting edge" and even hopefully ahead of the curve. Which would be highly beneficial to me creating and designing tech/software that hasn't even been thought of or implemented yet "as far fetched as that sounds"

TECH LEADERS SUMMIT:

Tech leaders summit look to be like a great place to hear about other developers and tech related peoples projects, how they found it went what they would do differently but

also what the techs purpose is and how it serves. Once again this is another great opportunity for me to get among as it can help fill my head with ideas to brainstorm web development ideas, software development ideas and maybe even potential career advancement opportunities, as upskilling/learning more about other respective fields is certainly a wise thing to do in such a fast growing and expanding environment like tech. There will be plenty of opportunities to network as I will be surrounded by peers and experts alike, so hopefully with a bit of experience under my belt with a personal portfolio of smaller development projects and a few earlier meetups this will be a great opportunity to expand.

ICCA TECHNOLOGY EXPO:

Now this particular Expo seems to be one of if not my most interesting prospect to visit as there will be a lot of technological breakthroughs discussed from industry leaders Aswell as networking opportunities with leading solution providers all over Australia! There will be a lot of exposure t Technological innovation which should introduce me and arm me with a unique chance to stay at the forefront of cutting edge technology while planning for even more exposure.

there will be a lot of different product on display for me to view which will expand my knowledge of what's on offer why its on offer and how to functions and hopefully the building block to how it was designed so I can learn from the process.

MOBILE APP DEVELOPMENT MEETUP:

Now this is a smaller more personal meetup, however beign that this is closer to the current date it works out perfectly, as being that its more personal and smaller it gives me a great opportunity to make some friends in the industry that will no doubt be interested in the tech events coming up, which may mean I could have company and like minds around to not only bounce ideas off but attend the upcoming events with, reducing the anxiety of being all alone at a large event.

But not only that this particular meetup is directed right at the current content I'm studying(web development and application development), so it's perfectly aligned with what I would like to learn and am learning Aswell as being a wonderful opportunity to dip my toes into the meetups of Brisbane and tech.
